Subject: Chinese NB reply about WLAN proposal

Dear Mrs. Lisa Rajchel,

Chinese NB really appreciated your concern and effective investigation into this issue. The information provided in your letter is a great help for us to further understand the whole process of this issue and related procedure requirements.

After serious consideration, we come up with the following comments:

1. We insist on processing our proposal under ISO/IEC JTC1, instead of submission of its proposal to the IEEE.

As for the action taken by ISO/IEC/JTC1 and SC6 on the two proposals（JTC1 N 7506，N7537）we can not accept. Chinese proposal was submitted to JTC1 much earlier than UK IEEE802.11i. However, as you mentioned in your letter, due to your “series of misunderstandings and administrative error”, JTC1 N7506 submitted earlier is stuck in procedure, but JTC1N7537 is already in fast track processing. To make it worse, the Orlando meeting resolutions (to put forward two proposals concurrently) have never been implemented properly after the meeting. This is what we can NOT/NOT accept at all. This is an unfair treatment on Chinese proposal.

We strongly request to immediately stop the fast track ballot on JTC1 N7537, so that an effective discussion can be held on JTC1 N7537 and N7506 at the Frankfurt meeting. This is the common sense reached at the Orlando meeting and the reason why the Frankfurt meeting needs to be held.

2. We notice that, as you mentioned in your letter, ANSI is investigating into the visa denial of Chinese specialists. We will give continuous concern on the investigation progress and expect clearer findings of it.

We would appreciate it if we could receive your reply on the action taken on JTC1N7537 proposal before the Frankfurt meeting.

Best regards

ZHANG Lin
